SURAT SERAH TERIMA HASIL PEKERJAAN

Nomor : 443/DIR-GSM/VI/2026
Tanggal : 3 Juni 2026
Lamp : 1 (Satu) Lembar

Kepada Yth,
Pejabat Pembuat Komitmen
Balai Besar Kalibrasi Fasilitas Penerbangan

Dengan Hormat,

Sehubungan dengan,

Kontrak Nomor : 0871 /KTR_525114/BBKFP/III/2026
Tanggal Kontrak : 9 Maret 2026
Nama Pekerjaan : Perbaikan dan Penggantian Komponen Pesawat
Udara BBKFP.
Nilai kontrak : Rp. 4.320.042.300,00 (Empat Miliar Tiga Ratus Dua
Puluh Juta Empat Puluh Dua Ribu Tiga Ratus Rupiah).

Bersama ini kami ajukan surat pemberitahuan Berita Acara Serah Terima Pekerjaan Perbaikan dan Penggantian Komponen Pesawat Udara BBKFP.

Demikian kami sampaikan, atas perhatian dan kerjasamanya kami ucapkan terima kasih.

Hormat Kami

Gusti Hadi Setiawan
Direktur

User/Installer Responsibilities

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article.

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1.

Statements in Blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

User/Installer Responsibilities

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/airframe.

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/airframe(s) from the airworthiness authority of the country specified in Block 1.

Statements in Blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

12. REMARKS

Unit was inspected, overhauled and tested in VV OHM, Section 30-01-21, and standard shop practices. A general description of work performed is attached as Work Order Form 001. Under the part description listed in blocks 6, 7, 8, 10 & 11 as applicable. A complete description of work performed is on file under the Work Order Tracking number in Block 3 & 5.

13a. Certifies the items identified above were manufactured in conformity to:

- ☐ Approved design data and are in a condition for safe operation. Non-
☐ approved design data specified in Block 12

14a. 2014 CFR 43.9 Return to Service

☐ Other regulation specified in Block 12
Certifies that unless otherwise specified in Block 12, the work identified in Block 11 and described in Block 12 was accomplished in accordance with Title 14, Code of Federal Regulations, part 43 and in respect to that work, the items are approved for return to service.

User/Installer Responsibilities

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article.

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that neither airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1.

Statements in Blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

User/Installer Responsibilities

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article. Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s) from the airworthiness authority of the country specified in Block 1. Statements in Blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

User/Installer Responsibilities

It is important to understand that the existence of this document alone does not automatically constitute authority to install the part/component/assembly.

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts parts/components/assemblies from the airworthiness authority of the country specified in Block 1.

Statements in Block 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

Tear Down/Inspection

Work Order #: W143185

Date Printed: 02/22/2025

Time: 1:36:37 PM

Page: 1

Cust PO: RD-2324

Alt Cust PO

Qty: 1

ESN: 04411

TSO UNK

PN: 8210-024-01

Serial #: 2135917

Descr: TURBOPROP GOVERNOR ASSEMBLY

Mfg: WOODWARD GOVERNOR

TSR UNK

Symptoms:**Reason Removed**

Removed for overhaul

Receiving Inspection

With shipping cover

Unit received as REV NEW.

Faults:**Inspection Findings**

Worn air bleed link return spring

Worn retainer assembly bushing.

Corrective Actions:**Work Recommended**

Overhaul IAW CMM with the incorporation of SB 33531C.

Unit requires replacement of parts listed.

Work Performed

Overhauled IAW CMM with the incorporation of SB 33531C.

Unit received replacement of parts listed.

PN	Description	Qty Needed	CD	Disposition	Status/Reason
3011-028	SPRING, AIRBLEED LINK RETURN	1	NE	Additional Part	Excessive Wear
3278-037	BUSHING, RETAINER ASSEMBLY	1	NE	Additional Part	Excessive Wear

User/Installer Responsibilities

It is important to understand that the existence of this document alone does not automatically constitute authority to install the part/component/assembly.

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts parts/components/assemblies from the airworthiness authority of the country specified in Block 1.

Statements in Block 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.
